

Fact Sheet

P2C2 Group, Inc.

REALISTIC BUSINESS SOLUTIONS FOR MISSION-DRIVEN TECHNOLOGY

AGILE MANAGEMENT AS A STRATEGY

The P2C2 Group, Inc. develops and implements solutions for the Federal capital programming process, which integrates the planning, acquisition, management, and performance assessment of capital assets. The process supports the successful management of major capital investments, such as information technology.

Our team enables leading contractors and the government agencies they support to leverage management processes as a strategic asset for performance and mission results. Our expert consulting team develops and helps implement realistic processes that advance business mission, rather than burdening program missions with overhead and delay.

P2C2 APPROACH

Our solutions support the technology management process: We customize best practices, streamline and integrate multiple requirements, and assist with ongoing process improvements

Capital Programming Lifecycle

TEAMWORK

The P2C2 Group is intentionally a small, lean group of senior experts that leverages its impact through teamwork with business partners and government agencies. We concentrate on strategy, analysis, solution planning, implementation support, model documentation, and performance assessment. Our partners—prime contractors and government organizations—provide complimentary expertise and most of the required workforce. This enables us to deliver value-added services at a very competitive lifecycle cost.

RECOGNITION FOR EXCELLENCE

"Your analytical ability, attention to detail, fortitude, and personal communication skills allowed you to gather information, analyze data, resolve technical conflicts and issues, and prepare high quality ... work." - Executive Office of the President, Y2K Acquisition Support
